In TiddlyWiki you can manage the Project's projects or get them with TiddlyWiki. It was released on July 20,, and has been reviewed as of March 17, The aim of TiddlyWiki is to provide a simple, lightweight, flexible wiki that works on multiple platforms and is highly configurable. About TiddlyWiki: TiddlyWiki is a free, open-source wiki program, used for creating and managing wiki pages. The TiddlyWiki interface is easy to use and it doesn't require any technical expertise or special software installation to get started. TiddlyWiki was started as a project to develop a free, open-source, self-updating wiki. The TiddlyWiki markup language is small and simple, so it's easy to learn. TiddlyWiki was originally developed in the Haskell programming language. TiddlyWiki allows you to easily create a webpage, database or documentation in a matter of minutes without using any other technology. TiddlyWiki is easy to install, and it can run on virtually any system. TiddlyWiki was released on November 13, and it is licensed under the GNU Free Documentation License. TiddlyWiki 4.1.3: Version 4.1.3 has been released on July 20, This version is a bug fix release. For a complete changelog see: Upgrading to TiddlyWiki 4.1.3. TiddlyWiki creates and manages wiki pages, without using any of the program's own code. It's an implementation of the W3C's Wiki Syntax Definition, so TiddlyWiki can be used in any web browser. Its easy to use interface makes it ideal for non-technical users who want to create a personal wiki or project wiki. Since the syntax is simple, and it does not require the use of HTML or XML, you can use any text editor to write your pages. The TiddlyWiki interface is highly configurable, and you can fully customize the appearance, font, background and style of the wiki pages and links. TiddlyWiki has a small memory footprint, so it can be run on most systems, including smartphones and tablets. TiddlyWiki supports multiple platforms, 82157476af
